### **General**

The valuation of assets and liabilities and the determination of the result are on the basis of the historical costs convention, except as stated below. Income and expenditure are allocated to the year to which they relate.

Profits are only recognised if they have been realised on the balance sheet date. Losses and risks which originate before the end of the financial year are considered if they have become known before the annual accounts are drawn up.

### **Foreign currency**

Assets and liabilities denominated in foreign currency are converted at the rates ruling at the end of the financial year, unless the exchange rate risk has been hedged. In this case valuation takes place at the agreed forward rate. Revenue and expenditure in foreign currencies are converted at the rate ruling on the date of the transaction. The exchange rate differences which arise during conversion are credited or charged to the profit and loss account.

## **ACCOUNTING POLICIES FOR THE VALUATION OF ASSETS AND LIABILITIES**

### **Other assets and liabilities**

Unless indicated otherwise above, all other assets and liabilities are valued at nominal value.

## **ACCOUNTING POLICIES FOR DETERMINING THE RESULT**
